REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: applicant recites an end structural body of a railway car and method of manufacturing the structural body. The structural body is comprised of first, second, and third plates. The first and third plates are provided at right and left sides respectively and have flanges formed thereon by bending the plates. The second plate is positioned between the first and third plates at an upper portion of the plates and connects the first and third plates. The second plate also has flanges formed thereon by bending of the plate. All three plates are set in place and welded together to form a unitary end unit for the car.

The prior art made of reference, taken singularly or in combination, does not specifically disclose the features recited in the instant claims. Specifically the prior art of Kawanishi et al (EPO 477,727) does not disclose the same structure using three plates formed, shaped and positioned in the manner recited in the instant claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert J. McCarry, Jr. whose telephone number is (571) 272-6683. The examiner can normally be reached on Monday through Friday 7:00am to 3:00pm.
